## PROJECTS

### Volunteer Site Redesign — *Pulsar Systems*

Redesigned the website for IT consultancy firm using modern, responsive principles. Utilized BulmaCSS and some jQuery.

<http://www.pulsarsystems.com/>

### Latest Headlines App

This single page app grabs the latest 10 headlines from a variety of news sources and presents them as clickable cards. Uses jQuery, vanilla JavaScript, and Bootstrap for styling. Also uses the [News API](#) to collect JSON news data from.

<https://papanugget.github.io/news-headlines/>

## EXPERIENCE

### New York University, New York — *Senior Computer Technician*

April 1996 - October 2016

Automated repetitive tasks with server side scripting / cron jobs. Maintained users database. Ensured business continuity through maintenance of hardware and software. Took ownership of payment processing project during Chip card migrations. Tuned networks for maximum uptime and stability through upgrades of hardware and software. Created disaster recovery plans in case of catastrophic failure.

## EDUCATION

### Udacity, *Front End Development Nanodegree*

April 2018 - October - 2018

Recipient of a Grow With Google scholarship after a 3 month challenge phase. Was selected out of a pool of 15,000 applicants. Graduated with a month to spare.
